

GROUND HANDLING SERVICE LEVEL AGREEMENT

Calicut International Airport (CCJ)

This Service Level Agreement (“Agreement”) is entered into between Calicut International Airport Authority (“Airport”) and the ground handling service providers named herein (each a “Vendor”), effective from 01 April 2026 to 31 December 2026 (“Term”).

1. Parties to the Agreement

1.1 Airport

Calicut International Airport Authority, Kozhikode, Kerala, India.

1.2 Vendors

- SkyServe Ground Handling Pvt Ltd — Baggage Handling Services
- AeroClean Facility Services — Aircraft Cabin Cleaning Services
- FuelTech Aviation Services — Aircraft Fueling Services

2. Scope of Services

Each Vendor shall provide the ground handling service(s) designated to it under Section 1.2 for all scheduled and chartered flights operating at the Airport during the Term, in accordance with the performance standards set out in Sections 3 through 5 below.

3. Service Level Standards — SkyServe Ground Handling Pvt Ltd

SkyServe Ground Handling Pvt Ltd shall be bound by the following baggage handling performance standard, measured between the specified start and stop events for each flight:

Metric	Start Event	Stop Event	Penalty for Breach	Max Duration Benchmark
Last bag delivery time	Aircraft chock-on	Last bag on belt	Rs. 8,000 per breach	45 minutes

“Last bag delivery time” is measured electronically via the Airport's baggage handling system (BHS), which timestamps the aircraft chock-on event and the last bag on belt event for every arriving flight. The maximum duration benchmark for this metric is 45 minutes, as set by the Airport's operational standards referenced in Section 6.

4. Service Level Standards — AeroClean Facility Services

AeroClean Facility Services shall be bound by the following cabin cleaning performance standard, measured between the specified start and stop events for each turnaround:

Metric	Start Event	Stop Event	Penalty for Breach	Max Duration Benchmark
Waste and galley servicing time	Cleaning crew boarding	Galley servicing complete	Rs. 6,000 per breach	18 minutes

Both events are logged by the cleaning crew supervisor at the aircraft door and cross-verified against the Airport's turnaround monitoring system. The maximum duration benchmark for this metric is 18 minutes, as set

by the Airport's operational standards referenced in Section 6.

5. Service Level Standards — FuelTech Aviation Services

FuelTech Aviation Services shall be bound by the following fueling performance standard, measured between the specified start and stop events for each flight:

Metric	Start Event	Stop Event	Penalty for Breach	Max Duration Benchmark
Fueling completion time	Bowser connection made	Fueling complete, signed off	Rs. 10,000 per breach	40 minutes

All event timestamps are logged via the Airport's Ramp Operations Control system and cross-verified against the Vendor's own fuel slip records. The maximum duration benchmark for this metric is 40 minutes, as set by the Airport's operational standards referenced in Section 6.

6. Breach Detection and Reporting

- Each Vendor shall submit daily operational performance data to the Airport's monitoring system by 23:59 on the day of operation, recording the actual start time and stop time of each event listed in Sections 3–5.
- A “breach” occurs whenever the elapsed time between the recorded start event and stop event for a given metric exceeds the maximum duration benchmark specified in the applicable Service Level Standards section (Sections 3–5) for that metric.
- Each breach shall be logged with the associated flight number, date, recorded start time, recorded stop time, and the specific clause breached.
- The Airport shall notify the relevant Vendor of any breach within 24 hours of detection.
- Vendors may raise a formal dispute against any logged breach within 7 calendar days of notification, accompanied by supporting evidence.

7. Penalty Invoicing

- Penalties for breaches shall accrue per occurrence as specified in the applicable Service Level Standards section.
- The Airport shall issue a consolidated penalty invoice to each Vendor on a monthly basis, itemizing every breach, the associated flight number and date, and the penalty amount.
- Undisputed penalty invoices are payable within 15 days of issuance.

8. Compliance Scoring

Each Vendor's compliance score shall be calculated as: $(\text{Total Service Events} - \text{Breach Events}) / \text{Total Service Events} \times 100$, evaluated monthly and on a rolling basis over the Term.

Rating	Score Range	Basis	Action
Green — Compliant	$\geq 95\%$	Rolling compliance score	No action required
Yellow — At Risk	80% – 94.9%	Rolling compliance score	Performance improvement notice issued
Red — Non-Compliant	$< 80\%$	Rolling compliance score	Formal review; renewal at risk

9. Contract Renewal

Not later than 90 days prior to expiry of the Term, the Airport shall review each Vendor's trailing 12-month (or, where the Term is shorter, the full available period) compliance score and shall determine, in its sole discretion, whether to (a) renew the Agreement on existing terms, (b) renew subject to renegotiated terms, or (c) decline to renew and seek an alternative service provider.

10. Force Majeure

No penalty shall accrue for any breach directly caused by force majeure events, including but not limited to severe weather, air traffic control strikes, security incidents, or government-mandated operational restrictions, provided the affected Vendor notifies the Airport within 24 hours of the event.

11. Term and Termination

This Agreement shall remain in effect from 01 April 2026 through 31 December 2026, unless terminated earlier by either party for material breach upon 30 days' written notice, or extended by mutual written agreement of the parties.

12. Signatures

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date first written above.
