

GROUND HANDLING SERVICE LEVEL AGREEMENT

Trivandrum International Airport (TRV)

This Service Level Agreement ("Agreement") is entered into between Trivandrum International Airport Authority ("Airport") and the ground handling service providers named herein (each a "Vendor"), effective from 01 August 2026 to 31 July 2027 ("Term").

1. Parties to the Agreement

1.1 Airport

Trivandrum International Airport Authority, Chackai, Thiruvananthapuram, Kerala, India.

1.2 Vendors

The following vendors are parties to this Agreement, each responsible for the designated service category: SwiftLoad Cargo & Baggage Services Pvt Ltd is engaged for Baggage Handling Services. AirFresh Cabin Solutions is engaged for Aircraft Cabin Cleaning Services. TurboPrime Aviation Fuels Ltd is engaged for Aircraft Fueling Services.

2. Scope of Services

Each Vendor shall provide the ground handling service(s) designated under Section 1.2 for all scheduled and chartered flights operating at the Airport during the Term. Services shall be delivered in strict conformance with the performance standards set out in Sections 3 through 5 of this Agreement, and in compliance with applicable aviation regulatory requirements.

3. Service Level Standards — SwiftLoad Cargo & Baggage Services Pvt Ltd

SwiftLoad Cargo & Baggage Services Pvt Ltd shall be solely responsible for baggage handling operations for all arriving flights at Trivandrum International Airport during the Term. The singular performance metric governing this service is the Last Bag Delivery Time.

This metric is defined as the elapsed duration between two precisely recorded timestamps: first, the moment the arriving aircraft's chocks are set ("Chock-On"), and second, the moment the final bag from that flight appears on the designated arrival baggage belt ("Last Bag on Belt"). Both timestamps are captured automatically through the Airport's Baggage Handling System (BHS).

The maximum permissible duration for this metric is thirty (30) minutes per flight. Any instance in which the elapsed time between Chock-On and Last Bag on Belt exceeds thirty minutes shall constitute a breach. Each individual breach shall attract a penalty of Rupees Five Thousand (Rs. 5,000) per occurrence, invoiced as set out in Section 7.

4. Service Level Standards — AirFresh Cabin Solutions

AirFresh Cabin Solutions shall be responsible for aircraft cabin cleaning and galley servicing during all turnaround operations at the Airport. The performance of AirFresh Cabin Solutions shall be assessed against the Waste and Galley Servicing Time metric.

This metric measures the elapsed time from the moment the cleaning crew supervisor logs boarding at the aircraft door ("Crew Boarding") to the moment the galley servicing is confirmed complete and signed off by the supervisor ("Galley Complete"). The crew boarding and galley complete events are recorded by the cleaning crew supervisor and cross-verified against the Airport's Turnaround Monitoring System.

The maximum permissible duration for this metric is twelve (12) minutes per turnaround. Any instance exceeding twelve minutes shall constitute a breach, and each such breach shall attract a penalty of Rupees Twenty-Two Thousand (Rs. 22,000) per occurrence.

5. Service Level Standards — TurboPrime Aviation Fuels Ltd

TurboPrime Aviation Fuels Ltd shall be responsible for the safe and timely fueling of all aircraft at Trivandrum International Airport during the Term. Performance shall be evaluated using the Fueling Completion Time metric.

The measurement window opens at the moment the fueling bowser's delivery nozzle is physically connected to the aircraft fuel port ("Bowser Connection") and closes at the moment fueling is confirmed complete, the delivery note is signed, and the nozzle is disconnected ("Fueling Sign-Off"). Timestamps for both events are recorded through the Airport's Ramp Operations Control system and independently corroborated against TurboPrime's own fuel slip records.

The maximum permissible fueling completion time is sixty (60) minutes per flight. Each breach — that is, any instance where the elapsed time between Bowser Connection and Fueling Sign-Off exceeds sixty minutes — shall attract a penalty of Rupees One Thousand Two Hundred (Rs. 1,200) per occurrence.

6. Breach Detection and Reporting

Each Vendor is required to submit daily operational performance records to the Airport's central monitoring system no later than 23:59 on the day of operation. These records must include the actual start time and stop time for each service event covered under Sections 3, 4, and 5 respectively.

A breach is triggered automatically whenever the elapsed time between the recorded start event and the recorded stop event for a given metric exceeds the maximum duration benchmark specified for that Vendor in the applicable section of this Agreement. Each detected breach is logged with the associated flight number, date, recorded start time, recorded stop time, and the specific contractual clause breached.

The Airport shall notify the relevant Vendor of any breach within twenty-four (24) hours of detection. A Vendor wishing to contest a logged breach must raise a formal dispute within seven (7) calendar days of receiving the breach notification, supported by documentary evidence.

7. Penalty Invoicing

Penalties shall accrue on a per-occurrence basis at the rates specified in Sections 3, 4, and 5. The Airport shall issue a consolidated penalty invoice to each Vendor on a monthly basis, itemizing every breach by flight number, date, and penalty amount. Undisputed invoices are payable within fifteen (15)

days of issuance.

8. Compliance Scoring

Each Vendor's rolling compliance score shall be calculated as the ratio of compliant service events to total service events, expressed as a percentage: (Total Service Events minus Breach Events) divided by Total Service Events, multiplied by one hundred. This score is evaluated both monthly and on a rolling basis across the full Term.

A score of ninety-eight percent (98%) or above places the Vendor in Green — Compliant status, requiring no corrective action. A score between eighty-six percent (86%) and ninety-seven point nine percent (97.9%) places the Vendor in Yellow — At Risk status, triggering issuance of a formal performance improvement notice. A score below eighty-six percent (86%) places the Vendor in Red — Non-Compliant status, resulting in a formal operational review and placing the contract renewal at risk.

9. Contract Renewal

Not later than ninety (90) days before expiry of the Term, the Airport shall conduct a review of each Vendor's trailing twelve-month compliance score, or the full available period where the Term is shorter. Based on this review, the Airport may, at its sole discretion, renew the Agreement on existing terms, renew subject to renegotiated conditions, or decline to renew and engage an alternative service provider.

10. Force Majeure

No penalty shall accrue for any breach that is directly and demonstrably caused by a force majeure event, including but not limited to severe weather disruptions, air traffic control strikes, declared security incidents, or government-mandated operational restrictions. To invoke this clause, the affected Vendor must notify the Airport in writing within twenty-four (24) hours of the triggering event.

11. Term and Termination

This Agreement shall remain in effect from 01 August 2026 through 31 July 2027, unless terminated earlier by either party for material breach upon thirty (30) days' written notice, or extended by mutual written agreement of both parties.
